Features

Only VOICE, Just 5 seconds

1

Easy and Simple

Easy-to-understand operation screen, Good UI

2

Anytime, Anywhere

Multi devices, Quick response

3

Everyone

Language free and Age free

4

Save Money

Subscription, No initial cost

Real Time Data Linkage

You can use it on multiple devices. Measurement data is linked in real time.

Group administrators can check the status of members on the dashboard.

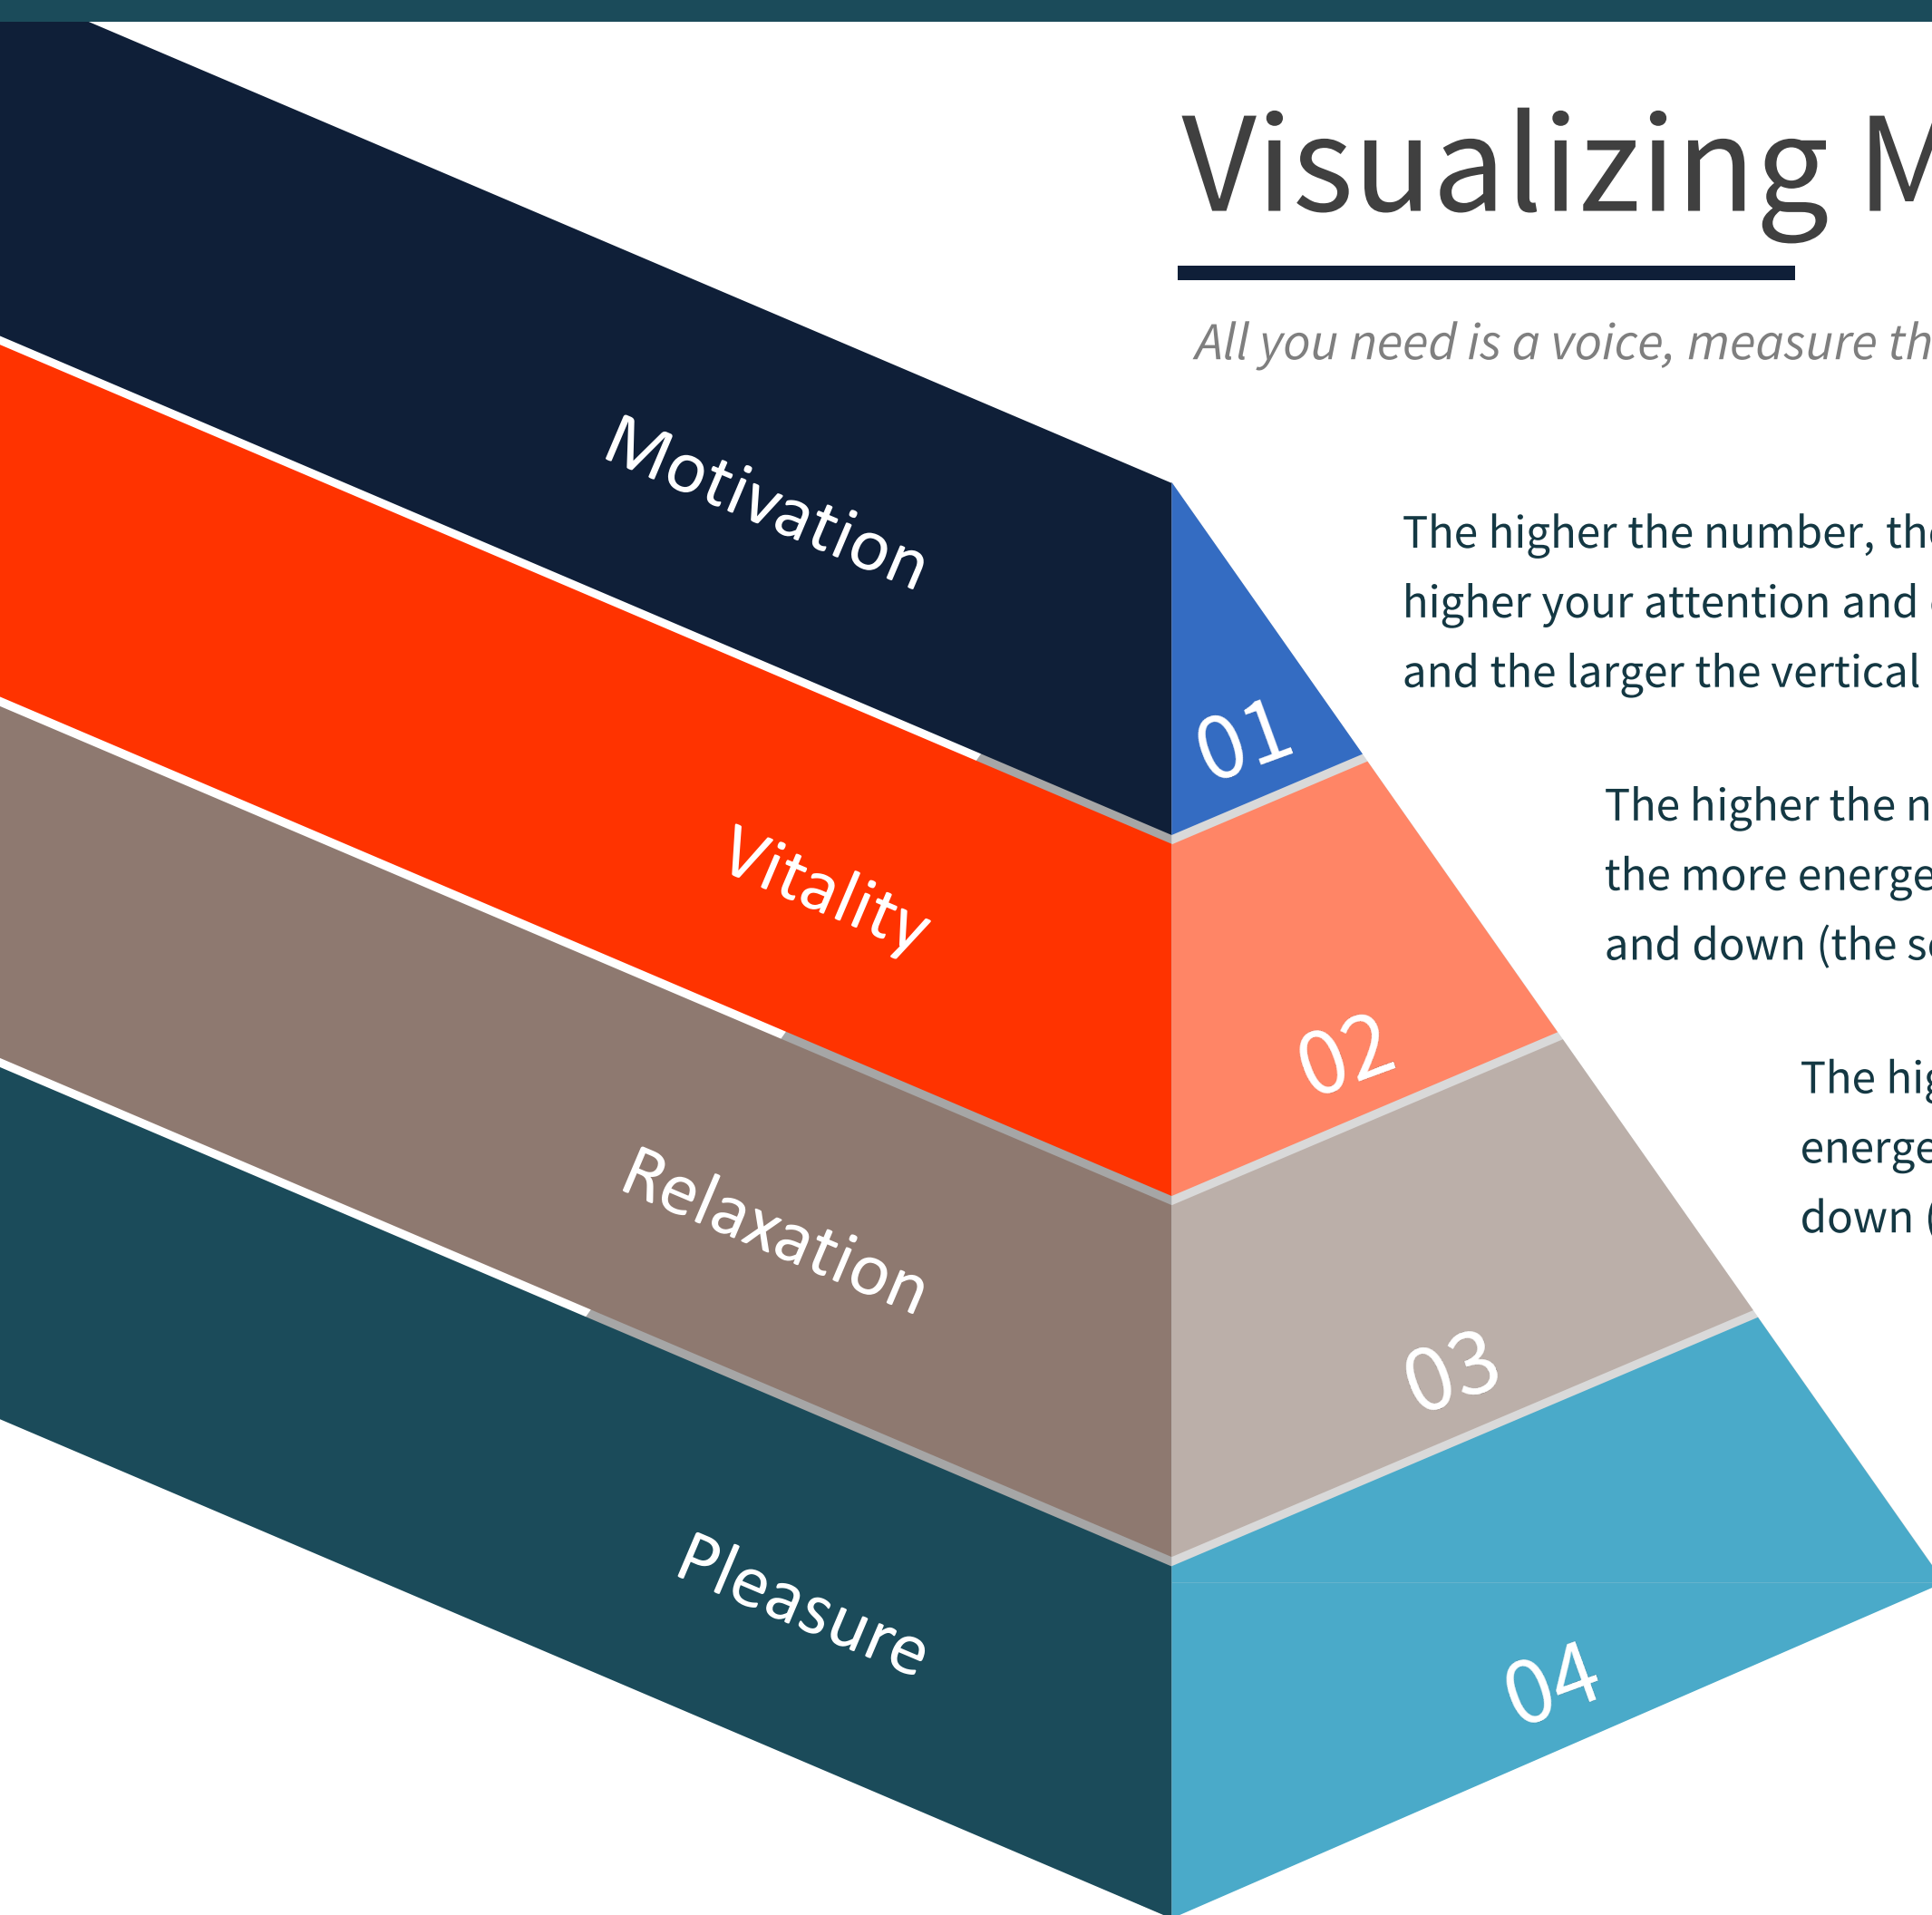

Application

- ✓ Intuitive "easy-to-understand" operability
- ✓ High visible charts function
- ✓ Average and volatility (from own data and total data of RimTech)
- ✓ CSV download*

* Provided as an advanced version for individuals. Standard equipment for corporations as a group administrator function.

Visualizing Motivation

All you need is a voice, measure the real state according to the timely event

The higher the number, the more motivated you are to work, and the higher your attention and concentration. The value of vitality is high, and the larger the vertical fluctuation, the higher the value.

The higher the number, the more energetic (comfortable). In addition, the more energetic the state, the more the numerical value moves up and down (the sensitivity of the mind is high).

The higher the number, the calmer the state. In addition, the more energetic the state, the more the numerical value moves up and down (the sensitivity of the mind is high).

The higher the number, the happier you are. In addition, the more energetic the state, the more the numerical value moves up and down (the sensitivity of the mind is high).

Thank you
